Model Options	
0336	4" (102 mm) Spout
0336-D	6" (152 mm) Spout

Designed with high traffic environments in mind, this foam soap dispenser is a cost effective way to maintain a positive guest experience in your washroom. Soap is manually dispensed by pushing down on the plunger cap using no more than 5 lbs (22.2 Newtons) of pressure to actuate, making it ADA Compliant. Its satin stainless steel finish and choice of 4" or 6" spout allows for design versatility to meet your needs. The translucent soap container can be refilled by either unscrewing the stem and body to expose the internal fill opening, or by removing the tank from under the vanity.
