

WASH YOUR HANDS NOT THE WALL

OPTIONAL CERAMIC BACKSPLASH PLATE FOR TRI-UMPH™ HIGH-SPEED HAND DRYER

Thanks to the unique absorbing ceramic plate featured on the TRI-*Umph*™ Hand Dryer, water is kept off the floor.

That same absorbing material is now available as an optional backsplash plate, perfect for situations where owners would not want even a droplet of water on the wall behind the unit.

FEATURES:

- Large absorbing/evaporating ceramic plate covers the wall directly behind the opening of the unit
- Backsplash plate matches the ceramic plate on hand dryer
- Installation can be retroactive

Only our exclusive TRI-*Umph*™ hand dryer is 99% free from mold and bacteria.

Unlike competitor hand dryers that collect water which turns into bacteria—TRI-*Umph*™'s unique design eliminates 99% of mold, mildew and bacteria. The optional Ceramic Backsplash Plate for the TRI-*Umph*™ Hand Dryer ensures your washroom stays welcoming and clean to your customers, not the germs lurking in or around hand dryers.
